

n = 9 chronic HEV patients  
7 failed RBV treatment  
2 had RBV **contraindication**

Cornberg et. al 2020

### SofE pilot trial

24-week Sofosbuvir  
400 mg daily  
mono treatment

**Why did Sofosbuvir not lead to a sustained virological response?**

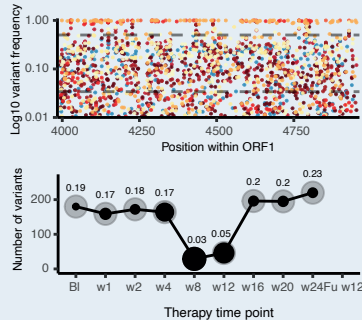

### Amplicon-based Sequencing

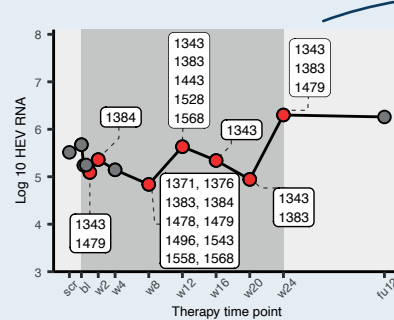

RdRp

### Quantification of viral diversity

### Characterization of treatment specific variants

### In vitro characterization
